

Your Guide to Recycling Nualtra Product Packaging

STEP 01

What type of packaging do you have?

STEP 02

Before recycling

Before placing in the recycling bin:

- ✓ Please remove and rinse any containers, foils or seals.
- ✓ Ensure you recycle the cap as well as the bottle/Tetra.
- ✓ Flatten Tetra cartons, starter pack boxes or any outer packaging.
- ✓ Printed sleeves can remain on the bottles.

STEP 03

Can all of the packaging be recycled?

Things to consider

Check your local recycling collection policy

Please check your local recycling collection policy for guidance on which recycling bin/bag to use for the different sorts of packaging.

All outer packaging for these products including starter packs, cluster wraps, cardboard trays and plastic wraps can be recycled.

*Whilst Tetra packaging is widely recyclable, there may be variations in curbside collections. As such, we recommend checking your local recycling guidelines.
